

Edoardo Cremente

Junior Gameplay & Systems Programmer

edoardo.cremonte@tiscali.it · Milan, Italy · github.com/e-cremente · linkedin.com/in/edoardo-cremente

PROFILE

Gameplay and systems programmer focused on building smooth, satisfying gameplay and the underlying systems that make a team's workflow easier. Comfortable across Unity (C#) and Unreal Engine (C++ / Blueprints), with hands-on experience from seven team projects and game jams — including three Lead Programmer roles.

SELECTED PROJECTS

Still Hear Jan – July 2026 · 7 months (still in development)

Unreal Engine · C++ / Blueprints — Lead Programmer (4-developer team)

- Complex Camera system based on Volumes which also handle Input.
- Gameplay Ability System integration, with development of a big amount of the Main Character's skills.
- Research and integration of plugins such as Flow Graph and Common UI for best possible architecture.
- Worked on several Shaders for the game, for both in game Materials and Post Process.
- Implemented a complete Weather System focusing around rain and thunders.
- Implemented the complete AI behaviour, skills, animation and control rig for one of the main enemies.
- Implemented an Input Rebinding system.

ToDuat! May – Jun 2025 · 2 months

Unity · C# — Lead Programmer (3-developer team)

- Led a 3-developer team: defined the project architecture and coding conventions.
- Built the interaction system, game flow & rules, quest system and tutorial, plus designer-facing tools (Scriptable Objects); supported dialogue system.

EDUCATION
